

The Centurion

Volume 2010 , Issue 3 July - September, Priceless

2010 Eyeball !

This years Eyeball was held in Natchez , MS. And in Vidalia, LA . This is a beautiful part of our country with a great number of it homes dating back to before the Civil War . With club members working the nets from both sides of the Mississippi river a great time was had by all This years host was Frank Krise , K5SVC who did a spectacular job sitting it all up for us . Not a small task ! Thanks Frank for all the hard work .

This year we are proud to announce that KB5GVR, Lynn Easom and K5FNS, Joe Rebecca were awarded the Ambassador award . This award is given to members who go out of their way to welcome newcomers to our nets and are very helpful as net relays .

**KB5GVR , Lynn Easom and
K5FNS , Joe Rebecca**

K5SVC , Frank Krize

W5WJN, Bill Nason

We all know him as Alligator Bill , but Crawfish Bill seem to fit also !
Larry Gillespie, K7MI looks on in the background.

New Masters 53

VE4ABU, Allan Rowe

Sorry I do not have a write up from either Al or Larry about their rise to the Masters Degree Award with our club .

I will say that these two are valuable members and are very much appreciated by all of us . Worthy of the clubs highest award !

New Masters 54

K7MI, Larry Gillespie Jr.

New Masters 55

For me the long road to my Masters was a long one, going back 10 years. I owe all of this to a good friend of mine who told me about the Century Club at our Tuesday morning coffee. His name is Bob N9BBV, some of our long time members remember Bob and he is the one who got me hooked. I listened to the 40 meter early net that night and checked in the next night, and was there most every night. In 2000, the Eyeball was in Cedar Rapids, IA and Bob and myself went and had the time of our lives and the people were great.

I mainly stayed on 40 meters and started working on awards, but never thought about Masters. My call sign then was K9TWV and I got about every award on 40 meters. One night they needed a NCS and I remember Gil W9YN yelled at me and said you can do it, and that was my first night as NCS. I had so much fun doing, I was doing it a few nights a week, next thing I knew, I was the 40 meter net coordinator for three years. Back then conditions were very good and we had very large nets and ran the entire 4 hours, sometimes splitting them with west coast stations. This worked out very well and we did this for a number of years.

NJ9T, Pete Thornton

In 2002 I was asked to run for 9th Area Director and was elected to two terms and was elected Board Chairman for four years. I started checking in to the 75 early net and started working on awards to match what I had on 40 meters. I was a regular on 40 and 75, and 160 when I had a chance. When we started the PSK nets, I got my 100 point awards on all of them, but concentrated on 40 and 75. One rule I have always had, is no radio on Friday nights, as that is family night, and family comes first.

In 2005, I was elected Vice President and served one year. In 2006, I was elected to my first term as club President, and 2008 my second term. I changed my call sign to NJ9T in 2006 and only had one award with that call sign on it at the end of 2009. I was the Parts and Service Manager at a Saturn car dealership, but when GM closed the brand down and we ran out of cars to sell at the end of December 2009 and the dealership was closed. It was winter time and what to do? It was time to play radio again, as I could stay up as late as I wanted. I went to Rick's page and put in my call to see how close to my Masters. To my surprise, I was not that far away.

I had everything for 40 meters, but lacked my CW and RTTY and DX on 75. There was one other that I did not have and that was my Nite Owl on 75, never stayed up that late due to work. The first thing I had to do was get antennas up for the CW and RTTY nets, this was fun with the snow and ice we had this past winter, but got them up and tuned.

I started checking into the 75 meter early net as many nights as I could, looking for DX and a big thanks to Larry K7MI for phone calls when DX showed up and I was not there. I got a list of DX stations that have checked into our nets, and started sending out e-mail inviting them to check into the net. This was more work than I thought, as response was not very good, so we just kept sending out e-mail inviting stations. I went back through all my old logs and found more DX and found the cards in boxes of used cards. With our jammer on 75 it did add more difficulty in getting the contacts. I was also able to get on the 75 late nets and got my Nite Owl award.

While all this was going on, I was checking into the CW and RTTY nets, and having fun. There are so many people to thank for helping me, Randy KJ4JC, Ricky AC7RA, Larry K7MI, and Milt AD5XD. There were many others, but these four made a big difference and I could not have done it without them. I also have to thank all the members that checked into the nets that made it happen and to Gene WM9H for getting the cards to me. When Gene found out I was that close, he would let me know when cards came in and got them to me. I also want to thank my Area Awards Manager Dave KE9OI for checking the awards and Mike K4NOP and Ronnie NC4RS for getting everything processed.

I never really thought about my Masters until I retired, but it was fun getting there, just took 10 years to get there. Where to go from here? When I get time to get back on the radio, six grandkids to watch and events that they are in, time is a little tight. I plan to get back into NCS work, as I enjoy it very much and also the CW and RTTY nets, as they are very enjoyable. I encourage all members to check and see how close you are to your Masters and go for it. I might add, that I have never used a program to do awards, just spread the cards out and start filling in the blanks. After doing this, I would then get on the nets and work the stations that were needed. I guess this is why it took me 10 years to get it done, but it was a fun trip.

73, Pete NJ9T
Master #55

CCLogger

This program is written for us by Dean Davis, N7XG . It is a very powerful logging program and you will wonder how you every did without it . Not only will it keep your calls sorted but will print your cards and send a list out to the reflectors . Way too many features to mention here ! Download from : www.Alpinesoft.com

GIB

This is Good in Bureau . This is a great program that is provided by Rick Mobley , WB5FDP . He has many helpful programs available for us to use . Awards look up by call , name or even for the month . Many more too ! <http://radiohome.com/wb5fdp/3905ccn/>

Chat Room

We have a Chat Room that has been made available to us from AI, VE4ABU . Great fun to chat with fellow CCN members while the nets are going on and even when there not . Just drop by and say hello . Always a room full !

The Chat Room is only available by contacting AI and requesting a download . Quick and easy . You might be surprised who all you run into there .

Contact VE4ABU at qrz.com and send him an email !

This is just a quick example of the programs that a few of our members have written for us . Just to let you know what was out there . I hope to have more details about their great programs in future issues . In their words , not mine . (much better)

Ron Stanley , Editor

2010 Eye Ball cont.

WT0A, Glen Felt

" Glad I got to make it to the 2010 eyeball. Met many fine folks there and had a great time. The high light for me was meeting Joe and Lynne and seeing them get the Ambassador award, you could tell they were touched and appreciated it,, The crawfish and BBQ were both fantastic"

Masters in attendance

I want try to name them but looks like a very good showing of Master Degree Holders at the Eyeball !

Donnie Hurst, KG4ZOD and Dwayne Lipscomb, KD4POJ

Donnie and his wife Ginger made the trip from North Carolina to join the festivities . Donnie is a valuable member of our club and is a net control very often . Dwayne is also one of our valued members . Now out of the Military he has more time to be on the nets and with his traveling partner Glen, WT0A have given our members some great and hard to get contacts . I think he's over that whole "high and tight" thing though !

N9DI, David Wade K0HNM, Larry Snyder And K5FNS, Joe Rebecca

Trip report.

My brother John N7JY and I (AD7DB) attended the Miss-Lou Eyeball. John was going on an extensive road trip towing his trailer. He left California in early May, went to the Dayton Hamvention, visited locations in several other states, then came south. I was unable to get that kind of time off of work and so I worked out a plan. I flew on a commercial flight to Baton Rouge and John picked me up at the airport there. We attended the Eyeball, and afterward he dropped me off at the airport again for me to go home.

Wednesday morning I got up early and prepared to leave. I walked one mile to the Flyaway terminal at Van Nuys Airport and rode a bus down to LAX. The first part of my trip was from LAX to Houston. This was a pleasant 3 1/2 hour ride. The George Bush Intercontinental Airport was rather confusing and I got turned around and couldn't at first find the terminal I needed to get to. I eventually did, with plenty of time to spare. More, as it turned out, because the connection flight was delayed over an hour due to thunderstorms around its previous stop (Little Rock). Finally the flight left just after sunset and I arrived at Baton Rouge at 9:15pm.

John was waiting for me as I came down the escalator and we were soon out of the airport. I'd had little to eat all day and so we went to a genuine Southern Waffle House (a little off our route, in Zachary We arrived at the campground in Vidalia LA rather late. I stayed with John in his trailer. Practically everything I needed had already been sent ahead with him.LA). And it was there that I decided to try grits for the first time. (Restaurants in the western U.S. don't tend to serve them.) My verdict? Interesting, but, like okra, I'll take the hash browns next time, thanks.

He's still digging And how many Cokes is that , 4? Larry couldn't stand to watch anymore !

We only pick at you because we care . Bill is really a class act and can be found on all the Century Club nets

We arrived at the campground in Vidalia LA rather late. I stayed with John in his trailer. Practically everything I needed had already been sent ahead with him.

The next morning we drove around the area. I'd been prepared to experience high humidity but WOW. It's relentless, even in the middle of the night, and with temperatures in the high 90's it made sense to stay inside with air conditioning. We saw a lot of different plants and trees, a completely different biome from the Southwest. After a short drive up the old Natchez Trace and back, we went over to the Hampton Inn in Natchez to meet the other attendees.

You know the old story about hams that you've known and talked to over the air for years but never met in person. You develop a mental impression of what they look like. Yep, some of them took us by surprise. Some looked a lot older than their voice gave away, and some were a lot younger. Only a few were about as we'd pictured them.

A QRP net was run on 40m SSB, but due to the time of the regular net it had to be cut short. N7JY and I operated as a combo from Louisiana that night and made lots of contacts. I had never been to this part of the country before.

Activities on Friday included breakfast at the Hampton Inn. Then it was over to the Vidalia side of the river for the shrimp and crawfish boil. Now THAT got interesting. The cuisine was reportedly very good according to others but personally it was far too spicy for me. The potatoes were good and even the boiled corn-on-the-cob had a terrific kick to it. The real thing that will

stick in my mind is the sight of Alligator Bill W5WJN helping himself to a truly massive quantity of crawfish!

Afterward it was back over to the Hampton Inn again, for an informative panel session about how our QSL bureaux work. Then there was the club board meeting, which was also very informative.

Next came another 40m QRP net. This is the one N7JY and I had made specific plans for. Two hams, two states, one vehicle. We wanted to each make mobile contact with the other from both states, to eventually help us toward the Clint Wise mobile award. We did it as follows. I checked in as portable MS at the station run by Dean N7XG. John was in his vehicle on the LA side and checked in as mobile. On my turn I made QSO with N7JY/m LA. John then came back to the MS side and a few minutes later he called me during his turn. I hurried out and we swapped places and rechecked with NCS. My next call was 7 minutes after his (due to an asymmetric check in; it was a longer wait from my turn to his than from his turn to mine). I contacted N7JY /p MS while I was mobile MS. Then I drove across the river to LA and parked just south of the bridge. On N7JY's turn, he contacted me while I was mobile LA. I then drove back across the river to the Hampton and rejoined him.

For the regular evening 40m net, we both operated as a combo, mobile from the MS side in the back parking lot of the Hampton - with quite a few others back there as well. Things got exciting when the sprinkler system came on; one maladjusted sprinkler kept repeatedly dousing our vehicle but stopping just short of coming in the windows. The net was winding down when John and I decided to go back to the trailer; our last two contacts were made mobile LA after we had crossed the river again. (If it had been a toll bridge they'd have made a fortune from us.)

On Saturday was another breakfast at the Hampton Inn and then it was time for a 75m QRP net. John and I opted to operate mobile from the Louisiana side. This net was run rodeo style, which made for some rapid-fire excitement.

The Mobile Antenna Shootout was held after that. There were a lot of entries with a considerable assortment of mobile installations. John tried to reclaim his title (he'd been Top Gun in 2004) but it was not to be this time. It was out in the hot sun on a big grassy field; I'd forgotten to put on any sunscreen and my arms got roasted.

Later that afternoon were the awards presentation, prize drawings, and an excellent BBQ banquet. I personally felt pleased that this time each prize was given away to the person whose ticket was drawn; none of this "steal from someone else" that drags out the drawing and makes for bad feelings. I hope this practice will be continued. Alligator Bill must have bought a ton of tickets because he won quite a number of things. There was a great group shot of a bunch of Master Degree Holders; we were fortunate to have so many in attendance.

That evening, John and I operated on the regular 40m net as a combo, mobile in LA.

On Sunday morning we went over to the Hampton one more time for breakfast and to say farewell to others who were leaving. Then John and I decided to take a ride up the Natchez Trace Parkway. We followed it as far as Port Gibson and then went north to Vicksburg to tour the Civil War battlefield. All the monuments and exhibits were very interesting, especially the recovered ironclad USS Cairo. This trip filled up the rest of the day and it was nearly dark by the time we got back to the Natchez area.

On Monday morning we broke camp and headed down to Baton Rouge. John dropped me off curbside right there in the airport (yes, with a 30 foot Airstream in tow) and continued on toward New Orleans.

My trip home was straightforward. Baton Rouge back to Houston, and Houston back to Los Angeles. All my flights were on time, enjoyable, and uneventful. Having only a small shoulder carry-on bag (the one I toted around all of the Eyeball events) I was able to get out of the terminal quickly, and before long I was on the Flyaway bus on the good old 405 for a one hour ride back to the San Fernando Valley in the midst of regular evening L.A. traffic. Then it was the one mile walk from there back to my house. I noticed something right away (besides the air being a lot drier and cooler) was that the people back in L.A. were noticeably more impersonal than all the friendly and polite Southerners I'd met on the trip.

Since I'd had no meal on the flight and only an Egg McMuffin for breakfast in Natchez that day, as soon as I got home I started up my truck and headed over to the nearest In-N-Out Burger for some genuine original Southern California cuisine!

3905 Century Club President WB5FDP, Rick Mobley

Well members, we have put another very successful eyeball behind us. I received only one negative comment about the eyeball (name/call withheld), and that comment was "It was just too short!".

Frank and his XYL, Joy, Robert, Molly along with several other local club members which he will provide names and calls all did a fantastic job. We were all well entertained and very well accommodated. Natchez, MS / Vidalia, LA is a beautiful location that straddles the Mississippi river.

I saw many people taking pictures and most have offered to upload them to Dean, N7XG to add to the collection of eyeball events there. Dean should send us a link once that is done. There were so many recipients to select from to receive awards and the tough decision had to be made for this process. I received several suggestions from many of the net coordinators, and some from members comments in general. Here is the list:

Ambassador's Award - Given to two very deserving people that have went out of their way to welcome new comers to our nets and have been very helpful during bad band conditions with relays. K5FNS and KB5GVR.

Certificate of Appreciation - W4NNO, W1BML and WM0F.

Leisure Mobile of the year - VE9DH, VE9SX and KC2PUF.

Professional Mobile of the year - N6RSH.

Outstanding NCS:

160m CW KJ4JC, 80m CW Early KI7PM, 80m CW Late AC7XF, 40m CW KI7PM, 20m CW KI7PM, 80m RTTY N7WH, 40m RTTY AD5XD, 20m RTTY N7WH, 80m PSK N7WH, 40m PSK KI7PM, 20m PSK KI7PM, 160m Early SSB WK7K, 160m SSB Late W0WSP, 75m SSB Early WR4C, 75m SSB Late K7MI, 40m SSB Early K5SVC, 40m SSB Late K7MI

K7MFG NCS of the year - KI7PM

KD3FM Annual Service Award - N7XG

Those that couldn't make it were missed and we hope you can attend one soon.

73,
Rick - WB5FDP
3905 CCN President

N5OHL, Jim Richardson

There were lots of prizes drawn for and selected from the many tables full of items. The two main prizes, AL811A was won by Jim Richardson, N5OHL and the FT857 was won by A.C. Brown, KZ3AB.

KZ3AB, Allen Brown

Sue and Harold Chambless , W4NNO

Harold and Fred , WB1I

“...W4NNO, Harold, could you put out a general call?”

“Sure, this is W4NNO assisting net control...”

Sounds familiar, right? Most nights on the 75M and 40M early SSB nets, Harold W4NNO is there helping with the net. What some people may not know is that Harold has been helping with the nets at least as far back as 1988 when I met him on the air. He was also a regular net control station and the club president at the time. He has been a big help to everyone on the nets and a great example to new comers to the nets for a long, long time.

I remember one night back then when my HW-101 wasn't working quite right. I was putting out a tiny amount of power and Harold took the time to help me get checked in. There were many other times he helped me when I was trying to get some rare contact, so when I was planning my driving trip to the Eyeball earlier this year, I just had to stop and visit Harold in Florida.

My trip worked out as plan and I arrived at Harold's house Thursday morning June 10th. It was a bright Florida day and he came out to meet me in the driveway. Harold has a beautiful home and he gave me the tour. We started in the computer room. There is a position for him and one for each member of house – very nice! His shack is in a separate building that he built in the back yard. We walked out back past the pool where his grand daughter was swimming. I met his beautiful wife Sue and their daughter-in-law Kellie. Harold and I went to the shack and talked for a while and worked on updating the logger on the shack computer. I commented about his Masters Degree Award on the wall and told me the story on how the award was designed.

I was only there for about an hour, but I was very happy to meet my friend after all these years. It was important to me to say thanks for all the help he has given me through the years and thanks for all the things Harold has done for the Century Club.

WB1I , Fred Casswell

3905 Century Club *2010 Miss-Lou Eyeball* **9th Annual Mobile Shootout**

Mobiles on the Century Club

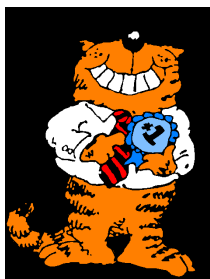

These are valuable contacts so next time you work a mobile tell them “ thanks for being there “

This year's Mobile Shootout was held on June 12, 2010 at 10:00 AM in Vidalia, LA. There were a total of 19 participants and 10 different brands of antennas. As in the past, the installations were interesting and varied. Of special interest was the installation of the Scorpion antenna on Fred, WB1I's Honda Accord. He utilized a large square of half inch thick aluminum which was attached to the luggage rack on the roof. The plate was well-bonded to the roof with silver coated copper braid at the four corners. The installation demonstrated very well Fred's understanding of proper installation techniques and his score backed that up. Many of the lower scoring entries can be traced directly to improper installation techniques such as low mounting on trailer hitches where ground losses are high, small main coils with low "Q", as well as main coils near vehicle sheet metal as a cause for even more losses. I do not make that statement disrespectfully, just as a matter of observation and fact. After all, the ultimate test of a mobile installation is whether or not you can hear and be heard and everyone in the shootout has made contacts on the nets at one time or another – it's just a matter of what you would rather hear, "Nothing Heard" or a 3-3 (that's the difference between last and 1st place).

New this year is a column that indicates the difference in dB between each individual score and the high score. Keep in mind that if 6dB is one S-Unit, the low score, in reality, would only be two S-Units down from the high score. Of course even one S-Unit can mean the difference between being heard and not being heard if your signal is at or below the noise level.

Also new this year, after the first table which includes all participants, are three additional tables which make it easy to compare the results of similar types of antennas. Hopefully this will make it easier to compare your antenna to the leader in your particular group. If you want to maximize your mobile signal, please visit <http://www.k0bg.com/> and follow Alan's instructions; he knows what he's talking about.

Special thanks to Ray, K5RFF for helping out Doug, WØWSP and taking so many pictures of the entrants mobile setups. Those pictures will be very informative for anyone wanting to compare their particular mobile setup with other similar setups to see what may have made the difference. Also thanks go to Bill, N3WD and Dwayne, KD4POJ for help with the scoring. A huge thank you to Doug, WØWSP who moved the test setup from vehicle to vehicle in 95+ degree, 80% humidity weather –this was not an easy task, but Doug's involvement was critical to the success of the shootout and I thank him very much.

I had a great time running the Shootout this year and I hope everyone else did as well. I'd be interested in knowing if there is anything you'd like to see changed in the way the Shootouts are conducted. Think of rules changes, testing methodology, frequency used, etc., etc. Nothing is off base and I'm running this for the club and its membership, so let me hear from you. I'd love to get to the point where we would have a little more time like on a Friday morning or afternoon before all the nets start to hold some kind of clinic and even do some hands-on improvements to participant's mobile setups prior to the actual Shootout, so that participants go into the Shootout with their best chance at a good score.

On a different topic, Frank, K5SVC put on a SUPERB Eyeball this year. Attendees were in Hog-Heaven, except for Alligator Bill, W5WJN who was in Mud-Bug-Heaven (take a look at the pictures). Frank, his wife and crew simply had all the bases covered and we are all so thankful for his diligence. As always, it was so heart-warming to renew old friendships face-to-face and to make new friends as well and do it in such a relaxing atmosphere that Frank had provided.

Additionally, as I was leaving the hotel to go to the Vidalia Convention Center for the banquet, someone yelled that 6 Meters was open, so on the way, I tuned up on 6 Meters and promptly worked Florida and Maryland on SSB. Of course it was during a contest and they wanted my grid square, but I had no clue what grid square I was in. I'm sure I didn't make those guys too happy.

I'm already chomping at the bit for the next Eyeball, so someone needs to come forth. It needs to be somewhere in the East, but I'm sure the board would be open to almost anything.

See you all soon.

73,

Lon, KØWJ

Florence and I traveled 5662.5 KM or 3518.5 miles- wow lots of driving!

My GPS took us down the Indian nation freeway and into South Texas where it poured in buckets but we made it to the eyeball OK. On the return trip we just made it through Okalahoma City where there was severe flooding and stayed in Guthrie overnight. Then on up to Lincoln Nebraska for some contacts while I was in the cap.

Made it home safe and had a great time. Thanks to Frank and Joy and all his helpers for a great Eyeball. Tom VE4HQ

W8NET , Miles / Gene Marsh took home the beautiful quilt donated by KB3PU , Jim and Judy Higgins .

My husband, KB3PU, asked if I would make a quilt as a door prize for the Eyeball. Since he does so much for me, it would have been very hard to tell him no. Plus I really enjoy playing with fabric. (All quilters understand that concept.)

Saying yes was the easy part. After that I had to decide on a pattern, alterations to the pattern, colors and fabric. The pattern that I chose is called "Turning Twenty." The alteration that I made was to add the Eyeball logo appliques. The next step was to go into my stash [KB3PU note - she could supply Walmart from her stash!] to chose color and fabric. Thinking the Eyeball was in July, I decided to go with red, white and blue. I wanted the quilt to be something that Jim would be proud to donate to the group and that hopefully someone would be happy to take home with them.

Quilters help each other. I knew that I could count on my friends for suggestions and any help that I might need. When Jim gave me a copy of the club logo, I took it to my friend, Judy Mayberry. Judy printed the logo onto a fabric background while I was working on the blocks. As I worked on the quilt top, several friends gave suggestions on fabric placement and encouragement that helped get the top finished.

My friend Connie Richardson did the quilting with her longarm quilting machine. When the quilt was finished I realized that I still had applique blocks left over, so I decided to make a pillow cover to match the quilt and included a small pillow.

I was very happy to be able to do this for my husband and the club. Hopefully someday he will let me come with him to another Eyeball. [KB3PU note - she's such a kiddler!]

Submitted by : Judy Higgins

Email Reflectors Groups

Our email reflectors have been a big help and make the nets run smoothly .

3905 Checkins : While on the net follow along with the check in list
 3905 Chat Group : General discussion and Club information
 3905 Award Talk : Q&A of awards .
 Hamtown : General Friendly chat (fun but clean please) also check in list for each net .

If you want to use links to signups for each of the groups, here they are...

3905Chatgp <http://groups.yahoo.com/group/3905chatgp/>
 3905Checkins <http://groups.yahoo.com/group/3905checkins/>
 3905AwdTalk <http://groups.yahoo.com/group/3905AwdTalk/>
 Hamtown <http://groups.yahoo.com/group/HamTown/>

You will have to subscribe and be approved for each you would like to join .

Our Club has many fine Awards !

Here is a complete listing of awards issued .

QNI 3905 CCN

Our club offers CW on 20 , 40 , 80 and 160 meters . The Digital nets are two fold , PSK-31 and RTTY formats on all bands except 160 meters . Check out our web site for schedules and come join in .

Editor's Corner

If you have anything that you would like to see in the Centurion please let me know . You can reach me at : nc4rs@triad.rr.com . I would like to thanks all that have contributed to this Newsletter and look forward to new stories to be in upcoming issues . If you have a mobile trip or Portable outing planed let me know and if the dates work with the newsletters printing well make sure it gets covered .

Thanks and 73
NC4RS
Ronnie Stanley
Centurion Editor .

Dayton Hamfest 4/2010

Here's a shot of this years Dayton Hamfest. All the Century Club members in attendance meet each year for a group photo .

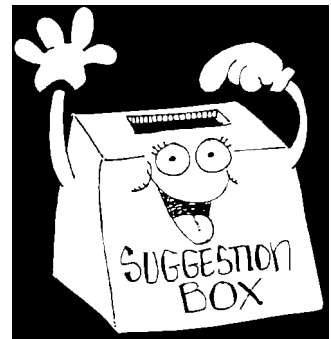

Back Row: N8FEB Jack, K9ZK Bill, WK7K John, N7XG Dean, K3QX Ed

Middle: KB9YVT Ann, KA9JAC Bob

Front Row: KB8UEY Bob, K4NOP Mike, K0WJ Lon, KOHNM Larry

If you have an idea or a suggestion that you would like to see implemented by our club let me know and I'll get it to the right person in our club that can handle the request .

Email me at :
nc4rs@triad.rr.com

The 3905 Century Club, Inc. is an International Amateur Radio Club incorporated in the state of Florida since February 1977. Its purpose is to assist hams both foreign and domestic in obtaining Worked all States awards. We have nets on 20,40,75,80, and 160 meters operating a mixture of SSB, CW, RTTY and PSK-31 modes . The Club offers many fine certificates for contacts made on its nets .
